The Bronx marble range is made out of **Carrara white marble from ITALY.**

*This range has a light seal coat on the marble, however please see below on Page 2 which refers to a product “Care Cover” that we **HIGHLY** recommend to spray onto the marble to add protection from liquid and oil spills.*

We believe that every piece of furniture is unique and as your furniture is made from naturally occurring materials, it is important you are aware that it may feature some variations in colour, texture and/or grain. Whilst we try to keep these variations to a minimum, if present they serve to add character and charm.

Usage considerations:

- 1) Prohibit from weight and crashing, this may cause serious damage to the furniture**
- 2) Keep away from acid, alkali, corrosive chemicals & organic solvent. Avoid using products with special chemicals for cleaning**
- 3) Keep away from sharp objects, as this will destroy protection coating and paint**
- 4) If dirty, please use a wet cloth to clean softly and dry with a cotton cloth. Please wipe quickly if any colour beverages or chemicals are spilt**
- 5) If tables are not stable, please adjust base and adjustable feet to level**

Direct Sunlight

All marble top surfaces when subjected to direct or indirect sunlight will mellow and change colour over a period of time. Please do NOT locate this range in high temperature or high humidity areas, keep in dry and ventilated areas. This range is for indoor use only. Poor environment will shorten life span of this range, so good care of your furniture is required to ensure the longevity.

Heat

Furniture will endure most temperatures in homes. However it should be positioned as far away from radiators, direct sunlight, or other forms of direct heat sources as possible. Avoid extremes in humidity. This can cause metal to rust and loosen the backboard glue. Keep furniture away from air conditioning units. For protection against heat sources from hot plates and cups, quality tablemats and cloths should always be used.

Placing Objects on your Furniture

A protective mat should be used to protect the surface from marking.

Moving & Placing

Never drag furniture—always lift it. Do not drag objects over the furniture surface, lift them. It is always advisable to level furniture when placing it. This will ensure product is level and removed from undue pressures on joints.

Spillages

Never leave spillages. Remove them immediately with a cloth. Marble is naturally **extremely** POROUS and will quickly absorb any liquids that spill onto the table. To help with this situation, Nick Scali provide a product that will provide extra sealant to the marble top to minimize the possibility of permanent stains. Please see next page for details.

AVAILABLE IN-STORE:

Due to the fact that natural marble is highly porous, we **INSIST** every customer **MUST** purchase this product with their marble furniture, to help avoid severe staining from spilt liquids and provide extra protection however we don't guarantee it will provide **TOTAL** protection against stains. Spills **MUST** be wiped up immediately.

The product may leave a slightly changed finish to the surface, however this should dissipate over time.

We strongly suggest applying this **monthly**.

Please see in-store for more details on this product and to purchase.

Protect your concrete table from stains

The Care Cover concrete sealer provides an invisible barrier on concrete tables, helping to prevent food and liquid spills from staining permanently, and will make it easier to wipe up as they occur.

Easy and quick to apply!
